I just switched over from Starhub as my company has a CIS promo code with them. The entire process has been painless and smooth flowing. My number ported over with no problems and I received my new SIM card the same day I switched over. The numerous updates provided assured me that I would face no disruptions in service. Just got off the chat with customer service about some questions and they answered all of them to my utmost satisfaction. The customer service is top-notch and cell service has been excellent so far. I even got a Free Unlimited Data Add-on as a surprise bonus.
